Summary

Software Engineer with 3+ years of experience in designing and developing scalable, high-performance web applications using Angular (v8–v21), Java, and Spring Boot. Strong expertise in frontend architecture, performance optimization, and real-time applications. Proven experience in leading teams, delivering enterprise-grade systems, and integrating AI-based features and APIs.

Skills

Languages: Java, TypeScript, Python, HTML, CSS

Frontend: Angular (v8–v21), RxJS

Backend: Spring Boot, FastAPI

Databases: PostgreSQL, MongoDB, MySQL

Tools: Git, Docker, Jenkins, Postman

Concepts: REST APIs, JWT Authentication, RBAC, WebSockets, CI/CD, Agile, Unit Testing, AI Integration, Performance Optimization

Working History

Software Developer

Ibytes Bits and Bots Pvt Ltd

Apr 2025 – Present

Chennai, IN

- Led frontend architecture for Angular applications, improving scalability and maintainability
- Managed and mentored a 5-member team, increasing delivery speed by 30%
- Designed reusable component libraries, reducing code duplication by 40%
- Improved application performance by 30% using lazy loading and optimized change detection
- Developed full-stack features using Angular, Python, and MongoDB for real-time applications
- Led Angular upgrade from v8+ to v15–19, improving performance and fixing security vulnerabilities

Software Developer

Oasys Cybernetics Pvt Ltd

Aug 2023 – Apr 2025

Trichy, IN

- Migrated legacy JSF applications to Angular, improving UI performance and maintainability
- Designed and developed ERP modules for enterprise workflow automation
- Built RESTful APIs using Spring Boot and integrated with Angular and PostgreSQL
- Optimized database queries and frontend rendering for better system performance
- Worked in Agile environment to deliver features within strict deadlines

Key Projects

AI Avatar Assistant (Real-time Conversational System)

- Developed AI-powered web application with interactive 3D avatar using Angular
- Integrated open-source AI APIs with secure API key management
- Implemented real-time chat using speech-to-text and text-to-speech systems
- Built 3D avatar with lip-sync and head movement for realistic interaction
- Optimized API calls and UI rendering for real-time performance
- Deployed application on Vercel for scalable production use
- Live Demo: **AI Avatar Assistant**

Drilling AI (Oil & Gas Platform)

- Built AI-driven platform for real-time drilling data visualization using Angular 19
- Implemented WebSocket-based live data dashboards
- Designed RBAC-based secure access control system
- Improved performance using lazy loading and optimized state management

WDDI Project (Oil & Gas)

- Delivered enterprise-grade application within 120-day deadline
- Built scalable UI architecture using Angular 19

POS System – Government Project

- Developed POS system for billing and transaction management
- Integrated frontend with backend APIs for seamless workflow

E-commerce Platform – Stella Store

- Built full-stack e-commerce platform using Angular and Spring Boot
- Implemented product management and checkout workflows

Key Achievements

- Led Angular migration from v8+ to v15–19 across enterprise applications
- Improved frontend performance by up to 30% across projects
- Successfully led frontend teams and mentored junior developers
- Delivered enterprise and government projects within strict timelines

Certifications

- Cyber Security Training – National-Level Webinar
- Advanced Python Training – FITA Academy
- TCS National Qualifier Test (NQT) – 64%

Education

Coimbatore Institute of Engineering and Technology
B.Tech in Information Technology (CGPA: 7.8 / 10)

Coimbatore, IN
Aug 2018 – Apr 2022
