

Sivaraaj C

Senior Software Engineer

Chennai, Tamil Nadu, India
csivaraaj@gmail.com | +91 84890 17762 | LinkedIn | GitHub | Portfolio

Professional Summary

Senior Software Engineer with 3+ years of experience building scalable, high-performance web applications. Expert in **Angular** (versions 8 through 21), **TypeScript**, **Java**, and **Spring Boot** microservices architecture. Proven delivery of enterprise ERP, oil and gas, government POS, and e-commerce systems. Strong in REST APIs, WebSockets, PostgreSQL, MongoDB, CI/CD, Docker, Jenkins, Agile Scrum, team leadership, and AI integration. Improved application performance up to 30% and accelerated feature delivery by 30% through architecture, mentoring, and optimization.

Technical Skills

- **Programming Languages:** Java, TypeScript, JavaScript, Python, HTML5, CSS, SQL
- **Frontend:** Angular 8–21, RxJS, Reactive Forms, Lazy Loading, Change Detection, Component Libraries, Responsive UI
- **Backend:** Spring Boot, Spring REST, FastAPI, Microservices Architecture, Object-Oriented Programming (OOP)
- **Databases:** PostgreSQL, MySQL, MongoDB, Query Optimization
- **APIs and Integration:** RESTful APIs, WebSockets, RBAC, API Security, Postman
- **DevOps and Tools:** Git, GitHub, Docker, Jenkins, CI/CD, Agile, Scrum, Jira
- **Domains:** Enterprise Web Applications, ERP, Real-Time Dashboards, AI/ML Integration, E-Commerce

Professional Experience

Senior Software Engineer

Ibytes Bits and Bots Private Limited

April 2025 – Present

Chennai, India

- Improved enterprise application scalability by leading Angular frontend architecture design, enabling faster feature rollout and stronger cross-team code reuse.
- Accelerated feature delivery by 30% by managing and mentoring a 5-member cross-functional engineering team using Agile Scrum ceremonies and sprint planning.
- Reduced frontend code duplication by 40% by building reusable Angular component libraries and standardized UI design patterns.
- Improved application performance by 30% by implementing lazy loading, OnPush change detection, and Angular bundle optimization.
- Enabled real-time data workflows by developing full-stack features with Angular, Python (FastAPI), and MongoDB for production applications.
- Strengthened security and performance by leading Angular upgrade from version 8+ to versions 15–19, resolving vulnerabilities and regression issues.
- Reduced API error rate by 15% through validation improvements
- **Technologies:** Angular, TypeScript, Python, FastAPI, MongoDB, Git, Docker, Agile Scrum

Software Developer

Oasys Cybernetics Private Limited

August 2023 – April 2025

Trichy, India

- Improved UI performance and maintainability by migrating legacy JSF (JavaServer Faces) applications to modern Angular frontends.
- Increased system reliability under high load by designing scalable microservices architecture for enterprise backend services.
- Reduced technical debt by applying object-oriented design patterns to build maintainable, extensible Java Spring Boot services.
- Enabled seamless frontend-backend integration by building RESTful APIs with Spring Boot and connecting Angular clients to PostgreSQL.
- Enhanced ERP system performance by 25% by optimizing PostgreSQL queries with indexing and tuning Angular change detection.
- Achieved on-time enterprise releases by delivering features in Agile sprints with clear acceptance criteria and stakeholder alignment.
- **Technologies:** Angular, Java, Spring Boot, PostgreSQL, REST APIs, Microservices Architecture, Git, Agile Scrum

Education

Bachelor of Technology (B.Tech), Information Technology
Coimbatore Institute of Engineering and Technology

August 2018 – April 2022
Coimbatore, India

- Earned CGPA of 7.8 / 10.0

Projects

AI Avatar Assistant – Real-Time Conversational Web Application

- Improved user engagement by developing an AI-powered web application with interactive 3D avatar and real-time speech features using Angular and TypeScript.
- Secured third-party integrations by implementing open-source AI APIs with encrypted API key management and structured error handling.
- Increased accessibility by implementing real-time chat with speech-to-text and text-to-speech for hands-free user interaction.
- Reduced perceived interaction latency by optimizing API calls and UI rendering, targeting sub-100ms response for core chat flows.
- Achieved production readiness by deploying on Vercel with scalable hosting. **Demo: ai-web-ten-beta.vercel.app**
- **Technologies:** Angular, TypeScript, REST APIs, AI APIs, Vercel, Real-Time Systems

Drilling AI – Oil and Gas Data Platform

- Enabled real-time operational visibility by building an AI-driven drilling data visualization platform using Angular 19.
- Reduced real-time communication latency to under 100ms by implementing WebSocket-based live dashboards for field data streams.
- Improved dashboard load performance by 35% by applying lazy loading, route preloading, and optimized state management.
- Strengthened data access control by designing RBAC (role-based access control) for multi-role oil and gas users.
- Supported concurrent usage by architecting scalable frontend modules for high-frequency telemetry updates.
- **Technologies:** Angular 19, TypeScript, WebSockets, RBAC, REST APIs

WDDI Project – Oil and Gas Enterprise Application

- Met 100% of a 120-day enterprise deadline by delivering a production-ready oil and gas application on schedule.
- Reduced future maintenance effort by designing scalable Angular 19 UI architecture with modular feature boundaries.
- **Technologies:** Angular 19, TypeScript, Enterprise Web Applications

Government POS System – Point of Sale

- Streamlined government billing operations by developing a POS system for transaction and receipt management.
- Reduced manual workflow errors by integrating Angular frontend with REST APIs for automated end-to-end billing.
- **Technologies:** Angular, REST APIs, Full Stack Integration

Stella Store – E-Commerce Platform

- Increased online sales readiness by building a full-stack e-commerce platform with Angular and Spring Boot.
- Improved checkout completion rates by implementing product catalog, cart, checkout, and order management workflows.
- **Technologies:** Angular, Java, Spring Boot, REST APIs, PostgreSQL

Certifications

- Cyber Security Training – National-Level Webinar
- Advanced Python Training – FITA Academy, Chennai
- TCS National Qualifier Test (NQT) – Score: 64%
